

EL Kajam Hamza

Software Engineer student

📍 Témara, Maroc ✉ hamza.kajam@gmail.com ☎ +212658674360 🌐 el-kajam-hamza

PROFILE

Enthusiastic software engineering student at the International University of Rabat, with solid experience in web and software development. Proficient in designing responsive, user-centered applications and skilled in both frontend and backend technologies. Known for a problem-solving mindset and attention to detail, with a commitment to creating efficient, scalable solutions that meet real-world needs.

PROFESSIONAL EXPERIENCE

Computer network internship, Maroc Telecom 2023 May – 2023 Jun | Rabat

- Supervised and administered network operations using the SOLARWINDS platform
- Monitored network performance and identified potential issues proactively
- Performed troubleshooting to ensure optimal network uptime and efficiency
- Configured alerts and customized network monitoring tools to meet specific performance standards

IT development internship, CNESTEN 2022 Jun – 2022 Jul | Kénitra

- Developed a desktop application in Java integrated with MySQL for efficient resource management.
- Designed user-friendly interfaces for streamlined resource tracking and management.
- Implemented CRUD operations for managing data entries in a MySQL database.

PROJECTS

BUILTIFY, Saas web application

The platform enable businesses to create and manage websites, handle project workflows, and bill clients from a unified platform. The solution is designed for scalability, user autonomy, and enhanced security, meeting the needs of companies aiming to centralize online operations.

HeraTravel, Web application

Developed a web application for a travel agency, allowing users to browse and book curated travel plans. The app provides an intuitive interface for exploring travel options, real-time availability checks, and secure booking features, offering an efficient solution to streamline agency-client interactions.
